The Average Boy.

His second seven year period carries him to fourteen years. In this second seven years he generally breaks loose from the apron strings. He goes down town and stands where men congregate. He hears much that he should not hear. He hears profanity, obscenity, and coarse vulgarity. Men have not learned to restrain their converse in the presence of the impressionable boy.

From fourteen to twenty one is the danger period. It is also the smart-aleck period, for the average boy in his teens think what he doesn't know is of small importance. Sound advice to him is about ninety per cent sound and ten per cent advice.

It is the period when he pushes formality aside. It is the period in which he keeps late hours, if allowed to. It is also the period of anxiety for the mother, and the period of indifference for the father.

Unfortunately, just when the father should chum with his boy, shaping his thought and conduct, he manifests his greatest indifference. The father oftentimes chides the mother because of her anxiety and solicitude.

If the average boy can pass through this period from fourteen to twenty-one, and come clean, the battle is practically won. If he comes up to his twenty-first year coarse, vulgar, profane, and an undefined purpose, the chances of his making a thorough going citizen are against him.

A GENERAL MIX-UP IN YUBY DAM.

Yuby Dam, U. S. A.

Bad Billie Hell of Fiddlers Green, and Big Bill Gad of Gad Town, at the head of a gang of desperadoes of those towns, bore down on Yuby Dam yesterday afternoon.

They came by the way of "Bloody Gulch" and swooped down on our town like commanche indians, shooting everything that popped up his head.

The desperadoes of this place were ready to meet them, and after the fight had raged about thirty minutes, I threw my body guard into action and soon had Billy Hell's gang crowded over on the Sink-hole Farm, where a number were destroyed and the others made their escape by using the elevators in the Sink Holes that lead down into the head of Zig Zag hollow, where we could not follow them, with any degree of success.

A goodly number were killed and wounded on each side.

Among the wounded of Yuby Dam that deserve special mention is William O. Plunger, the chief of police at this place, probably serious, his tongue is shot out and his voice box is shattered.

He is suffering greatly, but is bearing his suffering very patiently. No word of complaint has passed his lips.

Little Sallie McGee, one of my spit-toon carriers, is also proba-

bly seriously wounded. The bullet struck her under the tongue about the time that she was fixing to swallow her soup, and was sucked downward with such a velocity that it came out at her heel.

The doctor said such a lengthy wound needed doctoring very long and that I would have to spit on the world awhile.

Also "Bad William Tell," the head commander of my body guard, was shot through the shoulder and probably wounded.

This has been the biggest fight we have had at this place for some time but things are back at normal to night.

I am having the dead weighted and dropped into Sink Hole No. nine, all except two of my spittoon carriers and the captain of my body guard, whom I will accord a Christian burial.

Billy Hell's m n used sawed off shot guns and dum dum bullets, so nearly all the wounded are dead.

The way Billy Hell is conducting himself is very aggravating. Society is disturbed Peace nearly destroyed.

Little Jimmy Crow has called halt on his series of lectures on peace, until this place can "round up" and shoot down the desperadoes of Fiddlers Green.
